SUMMARY

Motivated and detail-oriented Computer Science graduate with internship experience at Demy Software Solutions. Proficient in Java, Data Structures Algorithms (DSA), and Object-Oriented Programming (OOP), with a strong understanding of software development fundamentals and problem-solving techniques. Passionate about building efficient, scalable applications and committed to continuous learning. Seeking an entry-level Software Developer role where I can contribute technical expertise while growing professionally.

PROJECTS

Academic Project:

Brain Tumor Detection and Segmentation Using Deep Learning

Jan - May 2026

- * Developed an AI-based system to detect and segment brain tumors from MRI images.
- * Implemented a **Convolutional Neural Network (CNN)** model using TensorFlow and Keras for tumor classification.
- * Classified MRI images into **Glioma, Meningioma, Pituitary, and No Tumor** categories.
- * Performed image preprocessing techniques such as resizing, normalization, and noise reduction using OpenCV.
- * Highlighted the tumor region using image segmentation for better visualization.
- * Built a user-friendly web application using **Python, Flask, HTML, CSS, and JavaScript**.
- * Enabled MRI image upload with automatic prediction and confidence score display.
- * Integrated frontend, backend, and deep learning model into a single application.
- * Tested the system using multiple MRI images to evaluate prediction accuracy and reliability.
- * Improved understanding of **Deep Learning, Computer Vision, Medical Image Analysis, and Full-Stack Web Development**.

EDUCATION

2022 - 2026	Bachelor's Degree at Audisankara College	(GPA: 7.23/10)
2021	Class 12th Sri Chaithanya Jr College	(710)
2020	Class 10th ZPPHS	(8.8)

SKILLS

Programming Languages	Java,Python
Web UI Technologies	HTML,CSS,JavaScript
Databases	SQL,MYSQL,EXCEL
Operating System	Windows,Linux
Tools	Git,GitHub,GitLab,Visual Studio Code
